Art Unit: 2827

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-5 and 12-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Murdoch (4002282) and Shingai (5950100).

Art Unit: 2827

At column 2, lines 51 to column 3, line 68, and column 4, lines 30-37, Murdoch teaches most of the essential elements of claims 1-5 and 12-17.

Although, as cited, Murdoch teaches a "next metalized pad or terminal," Murdoch does not appear to explicitly teach a package lead.

Nonetheless, at column 3, lines 55-61, Shingai teaches a package lead 6. Moreover, it would have been obvious to combine the process of Shingai with the process of Murdoch because it would provide a next terminal.

Applicant's remarks filed 8-27-2 have been fully considered and rendered moot by the rejection supra.

The art made of record and not applied to the rejection is considered pertinent to applicant's disclosure. It is cited primarily to show inventions similar to the instant invention.
